

Thanks for 2019 - Serenity Gaming is looking forward to 2020!

In the final hours before the new year looks at us, will I take some time to look back on 2019, and especially on the year that Serenity Gaming can look back on.

2019 has been a busy year for SRG, I as manager can look back on a year where the Board of Directors has made a huge effort, where our players and coaches have shown great commitment and competitiveness, and where our production and talented casters week after week has provided fun, exciting and nerve-wracking streams for our tournaments. I am proud to look back at 3 well-functioning SRG Splits, where over 90 teams have been fighting for the honor, and the great prizes we especially enjoyed at the last event we ended at a nice LAN event in December.

2019 has also been a year of many competitions, tournaments, and events. We have been able to see Serenity Gaming teams participating in Leagues.gg's CSD, DSD, and PSD throughout the year, with varying success, but always with great commitment and passion for the game. Our teams have also participated in various English and Danish leagues, including VAL, EA, DEL, ESD and StreamHouse. We have participated in tournaments for Lan events, where our teams were noticed both NPF and KESA, as well as ESD's event. Wherever we have had teams, I am happy to have players and coaches who do it with life and soul, follow the rules and show Serenity Gaming from the best side.

I am very proud every day to be surrounded by people like you.

2019 was also the year when we set foot on the CS-GO stage, with a skilled and ambitious team, do I look forward to seeing what 2020 brings for them.

Of course, at Serenity Gaming we look forward, and 2020 is definitely looking good, I look forward to plans for a new SRG split, as well as new LAN events that we both hold ourselves, and look forward to participating. We look forward to bootcamps, which our board is currently working hard to plan, and we are especially looking forward to a lot of hours in the rift.
